

A game for 2-4 players

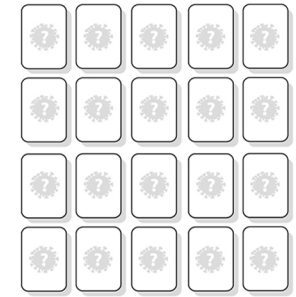

1 Shuffle and deal out the Immune System cards. 2 players (3 each), 3 or 4 players (2 each). Show these face-up

2 players 3 cards each

3-4 players 2 cards each

2 Shuffle the Infection Cards and place them in a 4x5 grid face down.

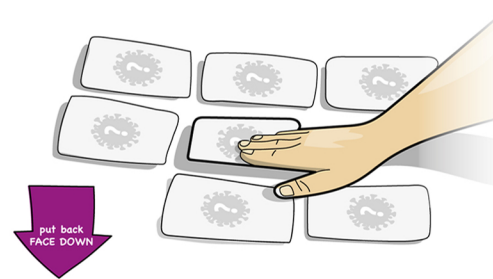

3 On your turn: First select one of your Immune System Cards to search with and declare it. e.g. "I select my red B cell"

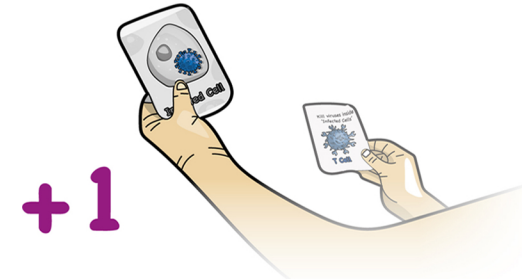

4 Pick one Infection Card and look at it secretly. You can select face-up cards that other players may have already revealed.

5 If it is a 'Healthy Cell' return it face-down.

6 If you selected a T cell as your Immune Card and you selected an 'Infected Cell' of the matching colour put it face up in front of you and score 1 point.

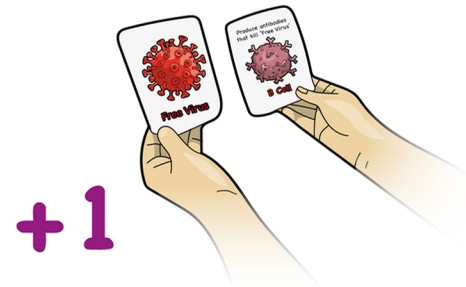

7 If you selected a T cell as your Immune Card and you selected an 'Infected Cell' of a different colour put it back but face-up.

8 If you selected a T cell as your Immune Card and you selected a 'Free Virus' of any colour put it back but face-down.

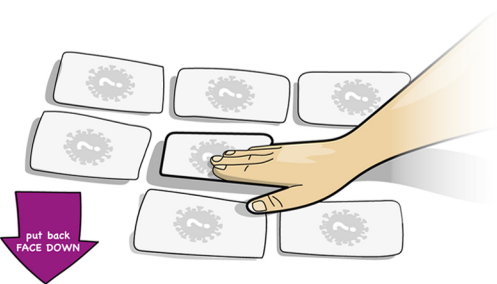

9 If you selected a B cell as your Immune Card and you selected a 'Free Virus' of the matching colour put it face-up in front of you and score 1 point.

10 If you selected a B cell as your Immune Card and you selected a 'Free Virus' of a different colour put it back but face-up.

11 If you selected a B cell as your Immune Card and you selected a 'Infected Cell' of any colour put it back but face-down.

12 Pass play clockwise to the next player e.g. Using my red B cell I reveal a blue Free Virus. I return it to the grid face-up. My opponent who has a blue B cell now selects the face-up blue Free Virus and puts it face-up in front of them. Next Turn using my red B cell I reveal a red Free Virus and put it face-up in front of me.

First 2 player game to score 6 or
First 3/4 player game to score 4
